Aspiring Software Developer

A dedicated Business Management graduate transitioning into full-stack software development, with skills in front-end technologies (React, Redux, Bootstrap) and back-end frameworks (Flask, PostgreSQL, Python, C#). Actively seeking an internship to gain practical experience and contribute to meaningful projects.

Combining a strong foundation in business principles with technical expertise, I offer a unique ability to align software solutions with organizational needs. Passionate about learning, solving complex problems, and growing as a professional in a tech-driven environment.
